PROFILE

Certified Full Stack Developer blending technical expertise (Java, JS, SQL) with advanced Business Analysis skills. With a proven track record in digitalizing critical processes within the Justice and Secure Logistics sectors, I architect high-performance software solutions that align with core business objectives. Bilingual (English C1) and committed to delivering technical rigor and strategic vision for large-scale enterprise projects.

TECHNICAL CERTIFICATIONS

- BUSINESS ANALYSIS (PMI)
- SQL ADVANCED (HACKERANK)
- PROJECT MANAGEMENT (PMI)
- ORACLE CLOUD AI
- JAVASCRIPT INTERMEDIATE (HACKERANK)
- PROJECT MANAGEMENT (NASBA)
- CYBERSECURITY FUNDAMENTALS (FORTINET)
- FRONTEND (HACKERANK)

TECHNICAL STACK

- BACKEND & LOGIC:** JAVA (SPRING BOOT), PHP (LARAVEL), NODE.JS, ENTERPRISE DESIGN PATTERNS.
- FRONTEND & UI:** REACT & NEXT.JS, STATE MANAGEMENT, CLIENT-SIDE OPTIMIZATION, UX/UI STRATEGY.
- API & DATA:** RESTFUL & GRAPHQL DESIGN, RELATIONAL SCHEMA (SQL), DATA ENCRYPTION & SECURITY.
- TOOLS:** GIT, DOCKER & KUBERNETES, AGILE/SCRUM, BUSINESS ANALYSIS.

LANGUAGES

- Anglais** C1 Advanced
- (Certifié EF SET)
- Français** Fluent
- Arabe** Native

PROFESSIONAL EXPERIENCE & EDUCATION

Palais de Justice Khouribga (Public Sector) Technical Project Lead & Full Stack Developer (Intern)

July – October 2025

Served as the technical lead for the digitization of judicial procedures. I translated complex legal requirements into technical specifications (Business Analysis) and developed a secure backend infrastructure using Java, PHP, and SQL. This initiative ensured total data confidentiality and achieved a 30% reduction in administrative processing time.

Brinks Security Casablanca (Logistics & Security) | Full Stack Developer (Final Year Intern)

April – Jun 2025

Designed and implemented a secure logistics tracking solution. I developed responsive user interfaces using React.js integrated with real-time REST APIs and optimized the database architecture for enhanced tracking. The final module was successfully deployed to maximize the operational efficiency of field teams.

Diplôme Universitaire de Technologie (DUT) Génie Informatique

2023 – 2025

Completed an intensive two-year technical program focusing on software engineering and system administration. I developed a solid mastery of n-tier architectures (Java EE), modern web development frameworks, and advanced database administration (Oracle/MySQL). The curriculum was driven by numerous practical, real-world projects that required high algorithmic rigor and the ability to collaborate effectively within teams under tight deadlines.

OCP Group Khouribga (CCI) IT Support & Automation Associate (Intern)

Août 2024

Immersed in a demanding industrial environment requiring high system availability, I ensured the operational maintenance of vital IT assets critical for production. Beyond providing daily technical support, I demonstrated initiative by identifying repetitive manual processes and developing automation scripts using Python and Bash for report generation. This proactive contribution significantly improved the reliability of maintenance data and optimized the overall workflow of the IT department.
